The Innovation Advantage

Innovation Fiberglass Products offers a unique combination of flexibility and durability. By blending glass fibers and resin with a polyester undercoat, our products achieve the tensile strength necessary to endure years of continuous use and still manage to weather well under extreme conditions.

Innovation Fiberglass Products won't melt in desert heat, nor will it crack in freezing winter conditions. Because Innovation molds are created for specific truck models, they achieve a precise fit that is unequalled by others. Sleek, flowing lines, close fitting edges, and a smooth Akzo Nobel-Sikkens automotive finish, all make Innovation Fiberglass Products look as if they were a part of the truck.

WARNING: SERIOUS or FATAL injury may occur from collision or carbon monoxide poisoning. This product is not designed to serve as a passenger compartment. Do not occupy pickup truck box while the engine is running or the vehicle is moving.
